

## VERSATILE, EASY-TO-USE SOFTWARE FOR ADVANCED ID PROGRAMS

### Powerful, modular platform

With separate packages for design, production, reporting and administration, Datacard® ID Works® Standard and Enterprise identification software let you distribute tasks effectively and pay only for the features you need at each workstation. Modular components include:

- Datacard ID Works Standard Designer
- Datacard ID Works Standard Production
- Datacard ID Works Standard Reporting
- Datacard ID Works Standard Administrator
- Datacard ID Works Enterprise Designer
- Datacard ID Works Enterprise Production

Datacard® ID Works® Standard and Enterprise identification software offer powerful, user-friendly tools for card design, secure card production and flexible management of sophisticated ID programs.

- **Biometrics and smart cards.** Both packages support a smart card plug-in (proximity). You can also design multi-application smart card programs with the ID Works Software Developer's Kit. In addition, Enterprise software provides the Education Support Pack, with SASI and Lifetouch plug-ins for easy image import and export. Enterprise software also supports a Biometric Server application for storing fingerprint minutia.
- **Intuitive design tools.** These applications enable you to design cards, reports and production forms with speed and simplicity. Shape drawing, transparent backgrounds and ghost images help customize cards. Both packages let you connect production forms to ODBC-compliant, multiple-table databases. Enterprise Designer software also allows you to access ID information stored in a directory service via the Lightweight Directory Access Protocol (LDAP).
- **Enhanced operational productivity.** Simple, powerful interfaces make it easy to capture images, enter and retrieve data and print cards and reports. Enterprise Production software also verifies biometric templates and offers enhanced password security.

**DATACARD® ID WORKS®  
STANDARD AND  
ENTERPRISE  
IDENTIFICATION  
SOFTWARE**

### Standard Features

#### Flexible card, report and production form design

User-defined card size (CR50, CR80, Custom)  
Auto-create production form  
Shape drawing support  
Font sizing and colors  
Multiple field selection, alignment and formatting  
Select desktop icons during install  
Copy card and report designs between projects

#### Field types

Variable text; Static text (with word wrap option); Photo (with border; ghost or transparent background option); Date; Bar code (21 or 22\* types); Magnetic stripe; Static and variable graphic (with ghost\* and transparent color options); Non-printable area; List; Composite; Print count; Auto sequence; Signature; Smart card; Binary field; Event button

#### Image management

In-production image import and export (.BMP, .EPS, .JPG, .PCT, .PCX, .PNG, .PSD, .TGA, .TIF, .WMF)  
Image and signature storage as BLOBs or files  
Multiple images per record  
Quick, advanced and stored searches  
Text field masking  
PDF417 binary bar code support\*  
Crop and adjust existing photo  
Batch import/export photos and images from production

#### Production and data management

Data-driven production  
Supports multiple-table databases  
Supports Software Developer's Kit

Smart card support pack (proximity)  
Education Support Pack (SASI & Lifetouch)\*  
Auto-create Microsoft® Access 2000 database  
Biometric Server application\*  
Unicode support  
LDAP-compliant directory services\* (such as Microsoft® Active Directory®)  
Wizard for managing user account privileges  
Retrieve records from "today"  
Retrieve records from "this week"

#### Database support

Oracle® Oracle8i and Oracle9i  
Microsoft Access 2000, 2002 and 2003  
Microsoft SQL Server 2000 and 2005  
IBM® DB2® Universal Server 7.1 and 8.1

#### Help features

Online user's guide  
Online help  
Help desk support

#### Security features

USB hardware security key  
Application- or activity-level user security  
Login timeout feature  
Restrict project access by user  
Secure user audit trail  
Enhanced user password security\*  
Expiration of password after user-defined number of days\*

#### Compatible Datacard card printers

SP Series card printer  
150i card personalization system  
275/280P/295 card personalization systems

#### Image capture options

File input  
CS-100  
Datacard Tru Photo solution  
Datacard Tru Photo professional solution  
Datacard Tru Fingerprint Solution (images and minutia\*)  
TWAIN capture devices  
Video for Windows capture devices  
Datacard TruSignature solution  
Datacard integrated signature pad

#### System Requirements

##### Operating system

Microsoft® Windows® 2000 Professional  
Windows XP Professional or Home Edition  
(Installing the latest service pack is recommended)

##### Web browser

Internet Explorer v5.01 or later

##### Processor

500 MHz Pentium® processor  
(1.5 GHz Pentium 4 recommended)

##### Memory

128 MB RAM (256 MB recommended)  
100 MB hard disk space for application (not including database)

##### Color

16-bit color (65,536 colors)  
(Cameras may require higher color)

##### Resolution

800 x 600 screen resolution  
(1024 x 768 recommended)

##### Peripherals

CD-ROM drive  
Available USB port

\* Enterprise software only
